PSP1000 series

Smart recording on the go

with Wi-Fi and three professional microphones

The SpeechAir smart voice recorder saves you time and resources by allowing you to work more flexibly than ever before. Integrated Wi-Fi functionality facilitates quick file download from any network. Recordings are encrypted in real time for maximum data security. The device also features three microphones dedicated to outstanding voice recording quality.

Superior audio quality and design

- Three dedicated microphones for optimized voice recording
- Large speaker for crystal clear audio playback
- Gorilla glass touch screen and shockproof, antimicrobial housing for durability
- Wear-free slide switch and function key for ultimate usability

Enhanced productivity

- Wi-Fi, LAN, Bluetooth, USB and VoIP to stay connected anywhere you go
- Barcode scanner and camera for quick file association
- Docking station for fast battery charging

Designed for professionals

- Philips dictation recorder app with professional dictation features
- File encryption for maximum data security
- Dictation software for an efficient workflow
- Optional remote administration for hassle-free central administration

Build your own solution

- Software development kit (SDK) for SpeechAir customized app creation
- Hardware SDK for seamless integration into your own workflow solution
- Android OS for intuitive use and app installation

No 1 in SPS global customer satisfaction survey 09/2015.

Highlights

Three professional microphones

Three professional microphones deliver ultimate sound quality in any recording situation. The 360° microphone is ideal for recording dictations and meetings. The direction microphone is best suited for noisy environments. For VoIP telephony the SpeechAir uses a dedicated microphone.

Large speaker

The large speaker allows you to playback your recordings in crystal-clear audio quality.

Gorilla glass and antimicrobial housing

Gorilla glass makes the device scratch and shock resistant. The device is shockproof according to military standard 516.6. The housing is made of antimicrobial synthetics. These materials work against bacteria and various microorganisms to ensure hygienic working.

Wear-free slide switch

The ergonomic and wear-free slide switch is designed for efficient single-handed operation without having to look down at the device. It allows for quick and easy dictation handling (play, pause, stop, fast forward, fast rewind). A customizable function key above the slider gives quick access to the dictation app.

Wi-Fi, LAN, USB and Bluetooth

Save time by transferring your finished recordings wirelessly to your transcription staff and directly access patient or client data. Use Wi-Fi for VoIP calls and access your emails and calendar. Use Bluetooth to send and receive data or to connect external speakers.

Barcode scanner and camera

The camera allows you to conveniently attach photos supporting your dictations. It can also be used as an integrated barcode scanner linking patient and client data to a recording.

Docking station

The docking station with an anti-theft system (Kensington lock) automatically transfers all your recordings to your computer and quickly re-charges your device. The LAN connection allows you to transfer your files directly from the docking station without a computer.

Philips Dictation app

The integrated recorder app comes with professional dictation features such as editing modes, priority, EOL flag, enhanced data and dictation list as well as sending options (to network folder, Philips SpeechLive services or email recipients).

Remote administration

Optional remote administration using Philips Remote Device Management software* allows IT administrators to manage, configure and update dictation hardware centrally, saving valuable time and resources.

* Available Q4/2016

Highlights

Maximum data security

Recordings are encrypted in real time using the Advanced Encryption Standard (AES) 256bit, which has been approved in the USA for the most highly classified government information. A PIN code protects the device against unauthorized use. Settings can be locked, for instance connection to Wi-Fi networks can be restricted.

Dictation workflow

SpeechAir also comes with Philips SpeechExec Pro Dictate software for an efficient and streamlined offline office workflow (PSP1200). The Philips SpeechLive service transfers your dictation workflow to the cloud and features online speech recognition and a transcription service. (www.speechlive.com)

Software development kit (SDK)

The software development kit (SDK) allows you to customize your existing app to use the different microphones, speakers, slide switch, function key, microphone sensitivity and LED.

Hardware SDK

The Hardware SDK allows the integration of SpeechAir into other workflow solutions, such as hospital information systems (HIS) or law practice management software. This allows for example access to patient and client data directly on your SpeechAir to achieve a smoother workflow.

Android operating system

Android is a secure and intuitive operating system which allows you to install apps on your SpeechAir and have all important applications on one single device.

Specifications

Device

Slide switch type: International slide switch (record/stop/play/rewind)
CPU: Dual Core Cortex-A9 1.6 GHz
RAM: 1 GB DDR3
Internal memory: 16 GB (12 GB available)
Operating system: Android 4.4.2
Color: dark grey pearl metallic and chrome frame
Sensors: light sensor, motion sensor, optical proximity sensor
Vibration module
Antimicrobial surface
Customizable function button

Dimensions

Product dimensions (W × D × H):
 62 × 127 × 15 mm / 2.4 × 5.0 × 0.6 inches
Weight: 116 g / 4.1 oz

Connectivity

Headphones: 3.5 mm / 1.4 inches
Microphone: 3.5 mm / 1.4 inches
USB: micro USB 2.0
Wi-Fi: IEEE 802.11 a/b/g/n
Bluetooth: 4.0
Docking station connector

Display

Type: IPS with 16 million colors
Screen type: scratch resistant Gorilla glass touch screen
Diagonal screen size: 10.16 cm / 4 inches
Resolution: 480 × 800 pixels

Audio (supported by operating system)

Recording format: AMR, ACC
Playback format: MPEG (MP1, MP2, MP3), WMA, WAV, APE, OGG (OGG, OGA), FLAC, AAC (AAC, M4A)

Microphones

Directional microphone: for speech recognition
360° microphone: for meetings and dictation
MEMS microphone: for VoIP telephony

Philips dictation recorder app

Recording modes: DSS Pro (DS2/mono), PCM Voice (WAV/mono)
Bit rate: 28 kbit/s (DSS Pro), 256 kbit/s (PCM Voice)
Edit modes: insert, overwrite, append
Recording time: 1073 hours (DS2), 117 hours (WAV)
Sample rate: 16 kHz / 16 bit
Supported barcodes: Code 39, Code 93, Codabar, Code128, Code 25, Code 11, MSI-Plessey, EAN, UPC, QR code, Data Matrix

Speakers

Speaker type: built-in rectangular dynamic speaker
Dimensions front speaker: 6 × 12 mm / 0.2 × 0.5 inches
Dimensions rear speaker: 11 × 15 mm / 0.4 × 0.6 inches

Camera

Resolution: 5 Megapixels
Autofocus
Flash
Image formats (supported by operating system): JPG, JPEG, BMP, GIF, PNG
Video recording formats (supported by operating system): H.264 / AVC (MOV, 3GP) up to 1920 × 1088 pixels (30fps)
Video playback formats (supported by operating system): MPEG-1/2 (DAT, MPG, VOB, TS) up to 1920 × 1088 pixels (30 fps), MPEG4 (AVI, MKV, MP4, MOV, 3GP) up to 1920 × 1088 pixels (30 fps), DIVX (AVI, MKV, MP4, MOV, 3GP) up to 1920 × 1088 pixels (30 fps), Real Media (RM, RMVB) up to 1920 × 1088 pixels (30 fps), H.264 (AVI, MKV, MP4, MOV, 3GP, TS, FLV) up to 1920 × 1088 pixels (30 fps), MVC H.264 (AVI, MOV) up to 1920 × 1088 pixels (60 fps), VP8 (WEBM) up to 1920 × 1088 pixels (30 fps), VC-1 (WMV, ASF, TS, MKV, AVI) up to 1920 × 1088 pixels (30 fps), H.263 (3GP, MOV, MP4) up to 704 × 576 pixels (30 fps), Sorensen Spark (FLV) up to 1920 × 1088 pixels (30 fps), ON2 VP6 (AVI, FLV) up to 1920 × 1088 pixels (30 fps), JPEG (AVI, MOV) up to 1920 × 1088 pixels (30 fps)

Power

Battery type: built-in rechargeable Li-ion battery
Battery capacity: 2700 mAh
Battery lifetime: up to 12 hours of recording (DSS QP mode)
Standby time: up to 97 hours
Charging time (full charge): approx. 3 hours

Docking station

Product dimensions (W × D × H):
 82 × 77 × 56 mm / 3.2 × 3.0 × 2.2 inches
Weight: 264 g / 9.3 oz
LAN connection
Kensington lock
Removable magnetic inlay for use with case

Green specifications

Compliant to 2011/65/EU (RoHS)

Operation conditions

Temperature: 5° – 45° C / 41° – 113° F
Humidity: 10 % – 90 %, noncondensing

Security

Real-time file encryption
Encryption standard (Philips dictation recorder app): Advanced Encryption Standard (AES) 256 bits
Device lock with PIN code or password
Configurable security settings with Software Development Kit (SDK) or configuration software
Lockable settings

System requirements for SpeechExec workflow software

Processor: Intel Dual-Core, 1.0 GHz or equivalent processor
RAM memory: 1 GB (2 GB recommended)
Hard disk space: 100 MB for SpeechExec software, 1 GB (32 bit)/2 GB (64 bit) for Microsoft .NET Framework
Operating system: Windows 10 (64 bit), Windows 8/7 (32/64 bit)
Free USB port
Graphics card: DirectX-compliant graphics card with hardware acceleration recommended
Windows Media Player must be installed

Specifications

Package contents

- SpeechAir smart voice recorder
- Docking station
- In-ear headphones
- 2 USB cables
- Power supply with international adapters: US, UK, Europe, Asia Pacific
- USB stick containing user manual, Philips SpeechExec Pro Dictate dictation software (PSP1200) and Philips SpeechAir management software
- Quick start guide

Available accessories (optional)

- Philips SpeechAir case ACC1120
- Philips telephone pickup microphone LFH9162
- Philips meeting microphone LFH9172
- Philips SDK for dictation hardware LFH7475
