

COMPLETEVIEW

VIDEO MANAGEMENT SYSTEMS

**Video Surveillance Solutions
That Work For You**

Simple.Scalable.Security™

COMPLETEVIEW VMS

Salient Systems provides the industry's most straight forward, cost effective approach to video surveillance ranging from a Cloud optimized edition of CompleteView to a feature rich, enterprise level version for complex video deployments.

A significant advantage of Salient's approach is protecting your investment in analog infrastructure as you implement new IP cameras and adopt new technologies such as Cloud video that leverage future growth and success. CompleteView is a comprehensive VMS solution available in four editions: CV ONE, CV Pro, CV Enterprise and CV Cloud.

CompleteView **ONE, Pro** and **Enterprise** editions include video and alarm clients, mapping, Spotlight, Quick Track, and Web Client with H.264 support. Free TouchView mobile apps are available for iOS and Android devices. The ability to grow from one edition up to another edition of CompleteView by simply paying the difference in the cost of the editions protects your investment and allows customers to scale and expand video deployments when necessary.

CompleteView **Cloud** offers inherent benefits which cannot be achieved with traditional video surveillance products. Cameras are the only hardware required onsite. Software maintenance and upgrades are transparent to the user. Salient's Web Client H.264 with cross browser support is utilized for live viewing and playback. Recordings are stored off-site thereby reducing the threat of theft, vandalism and manipulation.

With cross browser support for both Windows and Mac platforms and in combination with Dynamic Resolution Scaling, which is standard in all CompleteView editions, CompleteView is optimized to provide the fastest call up of video over remote internet connections.

Common Features on all Editions

- Simultaneous record, playback, live view and export
- Video Client
- Alarm Client (N/A in Cloud)
- Mapping Client
- Web Client
- CV Spotlight (N/A in Cloud)
- Remote software update
- Flexible motion detection
- Independent frame rate control up to 30 FPS
- Smart Search - based on motion in a defined area
- Multiple monitor support
- Stable Recording Architecture
- Hybrid support for both Analog and IP*
- Dynamic Resolution Scaling
- One time, per-camera license fee - no server/client fee
- Per-camera time zone setting
- Integration with IP and analog cameras

CompleteView	ONE	Pro	Enterprise	CLOUD
Salient Offers CompleteView NVR and Hybrid Systems or Software Only <ul style="list-style-type: none"> • Server configurations with IP camera software pre-installed. • Add video capture cards for an enterprise-ready hybrid, analog to IP solution.* 	Yes	Yes	Yes	Yes
Client Software Applications are Included with CompleteView <ul style="list-style-type: none"> • Video Client, Mapping functionality and Web Client. • Unlimited instances of the client can be installed and running simultaneously. 	Yes	Yes	Yes	Yes (encoder required)*
Advanced Alarm Monitoring <ul style="list-style-type: none"> • CV Spotlight and Alarm Client provide multiple options for alerting users to security events. Using these applications, users can focus on relevant video related to alarm and motion events. 	Yes	Yes	Yes	No
Dynamic Resolution Scaling <ul style="list-style-type: none"> • Video stream is downloaded from the camera and resized for display. Original resolution and quality is recorded. • Video is scaled for transmission based on viewing size in the client to minimize bandwidth usage. 	Yes	Yes	Yes	Yes
Stable Recording Architecture <ul style="list-style-type: none"> • Recorded video files and metadata are stored in small database files which avoids reliability problems. • Works with IT backup software; no need to use proprietary 'archiving' feature eliminating limited configuration options and functionality. 	Yes	Yes	Yes	Yes
Enterprise Focused / Scalable <ul style="list-style-type: none"> • Scales to any number of cameras/servers both in the CompleteView client and server applications. 	No	Yes	Yes	Yes
Seamless with Analog and IP Cameras <ul style="list-style-type: none"> • Analog and IP cameras are displayed without distinction. Provides for an easy migration from analog to IP when the user is ready. • Support third party encoders for network connections of analog cameras * 	Yes	Yes	Yes	Yes*
Easy Licensing - One Time, Per-Camera Fee <ul style="list-style-type: none"> • IP camera license is not tied to hardware address (MAC address). • All camera licenses are movable without Salient intervention for greater flexibility. 	Yes	Yes	Yes	Yes
Single Seat Administration <ul style="list-style-type: none"> • Single management application for multi server/multi client environments. • Push server and manage client software updates centrally. • Control configuration of multiple servers and clients simultaneously. • Monitor status of all servers and cameras system-wide from one console. 	No	Yes	Yes	Yes
Advanced Mapping Client <ul style="list-style-type: none"> • Definable field of view cones allow the operator to see more than just camera direction. • Field of view cones change color to indicate camera status, activity and recording type. • Motion is analyzed in real time and results are displayed immediately. 	Yes	Yes	Yes	Yes
Active Directory/LDAP User and Group Support <ul style="list-style-type: none"> • Import users and groups from Active Directory for seamless login across your network applications. • Restrict camera and system access by user or group. • Same login and permissions work for Alarm Client, Video Client and Web Client. 	No	No	Yes	No
Training and Support <ul style="list-style-type: none"> • US-based technical support. • Certified online training through Salient University eLearning. • Classroom Certification Training available for Resellers, Consultants and Technology 	Yes	Yes	Yes	Yes

About Salient Systems

In the world of video surveillance, Salient Systems Corporation stands apart. Founded in 1995, Salient has 20 years of experience in video imaging and video management software development.

With an IT mindset, Salient has combined this expertise with a deep understanding of the physical security world and the complex video surveillance demands in mission critical applications. Our products have been designed with both the end user and IT departments in mind and every version of our software includes features specifically created to make them easy to install and use.

About Voice Products

Voice Products started in June 1990 and has been selling and servicing products nationwide for voice, video, and call recording for over 25 years. More than 4,000 customers in public safety and other industries entrust their security and safety needs to Voice Products. Headquartered in Wichita, KS with sales and support offices located strategically through the US, Voice Products prides itself on providing the best possible customer experience in order to develop a long-term and beneficial relationship with their clients.

Powerful features that reduce bandwidth consumption and manage network resources are standard. Multi-server management tools give users the ability to remotely monitor all recording servers, associated cameras, user activity, storage volumes and more. Client and server updates can be pushed to multiple servers over the network simultaneously thereby reducing costs to customers.

Our approach to product design and development, sales and marketing and service and support has made us the voice of integrity in the ever changing video surveillance market.
