VIDEOTAG VT-100
TECHNICAL SPECIFICATIONS

The VideoTag VT-100 is an incident recording device from Edesix, specifically designed to meet the needs of retailers and other public facing businesses.

The VT-100 offers a cost-effective, secure and practical approach to body-worn security for incident recording and workflow management.
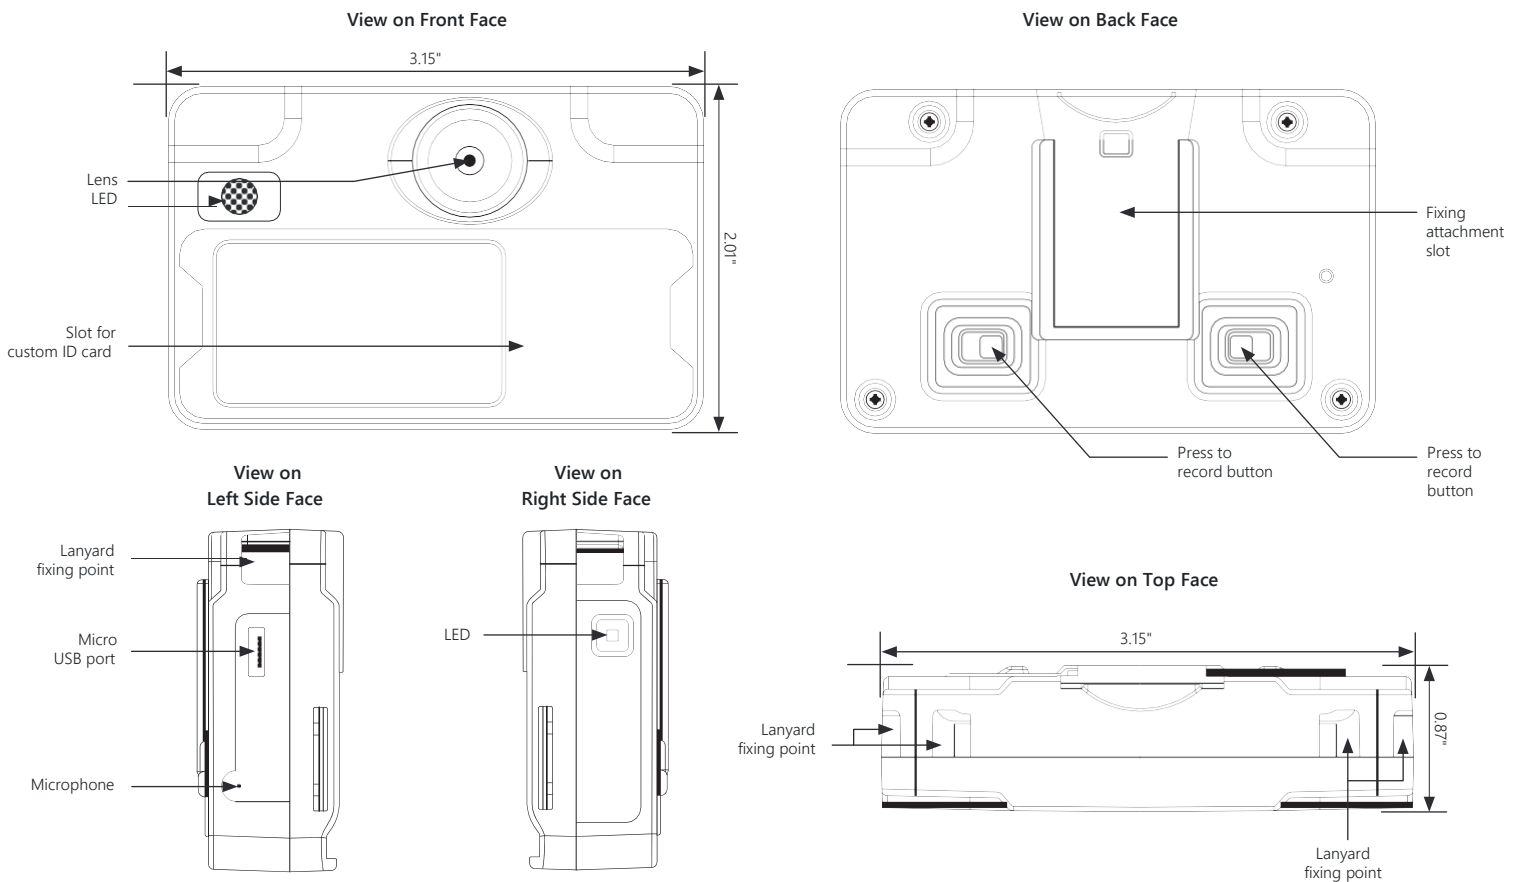

ONStream *Ready*

The VT-100 is capable of HD audio and video recording at 30fps and allows for immediate offload of footage captured via docking. The VT-100 is designed to be unobtrusive and easy to use, and is a low maintenance solution, requiring minimal attention with infrequent charging required.

The VT-100's form factor is designed to be similar to name badges used by retail staff, with a card insert below the camera lens that can be tailored to the individual user or organisation. The VT-100 can also be linked to existing CCTV installations, meaning all of your surveillance equipment can be analysed under one integrated system, creating one complete picture.

CAMERA FEATURE	DESCRIPTION / SPECIFICATION
Typical Usage	Enterprise managed incident recorder, for personal and site security
