

**Dictation, Transcription, Speech Recognition,
Computer-Assisted Coding & CDI Solutions**

Speech Recognition Radiology Solutions

Fusion speech recognition provides solutions that return measurable and tangible results for your investment.

The Fusion Suite™

DOLBEY
— SINCE 1914 —

What is the Fusion Suite?

Dolbey's award-winning healthcare suite of solutions improve productivity while delivering better documentation which improves patient care. Since 1914, Dolbey has consistently evolved its products incorporating the latest technologies available to meet the demands of the healthcare community. Today, our suite of products includes Speech Recognition (premise or cloud-based), CAPD, CDI, CAC, Transcription and Dictation.

**You can experience more accurate documentation,
healthier patients and better revenue cycle with Dolbey.**

Fusion Expert powered by SpeechMagic

Superior Image Reporting Through the Power of Fusion

Streamline workflows, increase efficiencies, and maximize revenue potential with Fusion Expert® powered by SpeechMagic™. A powerful, flexible speech recognition solution, Fusion Expert accommodates a variety of workflows and integrations enabling physicians to deliver timely, quality diagnostic reports while providing comprehensive data capture and analytics.

Fusion Expert is specifically created to meet the rigorous demands of radiology reporting. Its flexible design, focused radiology speech lexicon and data integration capabilities enable the creation of highly efficient workflows tailored to meet the needs of any radiology department. With a single speech license, it can accommodate the provider who prefers real-time speech recognition and self-editing, along with the user who wants to utilize the productivity of transcription assisted editing.

Integrations

Fusion Expert offers multiple options for bringing external data and diagnostic content into your reports. This data can be inserted in real-time or added to a paused report at your convenience. Dolbey has partnered with numerous vendors to improve radiology workflows and increase productivity and satisfaction for providers.

- **ACR Assist** - Support the Imaging 3.0 initiative with ACR's structured clinical guidance that allows content to be naturally incorporated into the radiology workflow.
- **External Data Integrations** - Import radiation dosage, DICOM, ultrasound information or other exam-related data from another system directly into your radiology report. Eliminate the need to dictate these values and ensure accuracy.
- **RSNA templates** - Access and utilize RSNA reporting templates directly.
- **StatDx** - Review Diagnostic Decision Support for Radiology with this integration.
- **Web Reference Material** - View commonly used websites and content like YottaLook, Bosniak Classification and Fleischner Criteria while in the report for diagnostic assistance.

Enhanced Quality

Whether you are looking to stay ahead of regulatory efforts or simply searching for a solution to improve the overall quality of your reporting, Fusion Expert offers several options to achieve your goals.

- **Fusion DocCheck - CAPD** - Identify inconsistencies, missing data, conflicting findings and more at the time of documentation, ensuring that your document is accurate from the start.
- **Dual Reads for Mammography** - Fulfill requirements set by the FDA and for MQSA inspections by implementing our solution to consult other radiologists for agreement on mammography reports or suspend a report for a second radiologist to review before marking the report final.
- **Critical Finding Reporting** - Find and collect data on reports with critical findings to ensure compliance with your organization and The Joint Commission.
- **Critical Finding Follow-up Trigger Words and Phrases** - Communicate critical findings immediately to other providers based on certain trigger words and phrases set by your facility.

For more than a century

Dolbey has been providing voice recording and document management solutions designed to help healthcare organizations improve workflow, boost productivity and increase profitability.

We are committed to enhancing radiology documentation workflow to save your organization time and allow your providers to get back to what matters most— patient care.

Since 1914, Dolby has been providing voice recording and document management solutions designed to help healthcare organizations improve workflow, boost productivity and increase profitability.

The Fusion Suite platform is Dolby's line of award-winning software products that includes dictation, transcription, speech recognition, clinical documentation improvement and computer-assisted coding technologies. Together they deliver an end-to-end solution which creates more accurate reporting of critical data elements and improves documentation, reimbursement and patient care.
