- HD Recording
- Multi-Room Support
- Clip-Builder/Redaction
- Chain of Evidence Reporting
- Channel Linking/PIP
- Searchable Notes and Metadata
- Bookmarking
- On-Demand Recording
- Export Only Audio
- Mobile Solution

Sample Interview Room Configuration

This sample interview room configuration shows two cameras for recording: a dome for an overhead view and a covert camera for focusing on the interviewee. There is one covert microphone that gets connected to both cameras so audio and video are synched for both video feeds. Finally, there is a toggle switch to start recording and an indicator light so you know it's working.

Dome, PTZ and Covert Cameras and Mics

Various Hardware Used
